• Prerequisite: Math 241.

• Course objectives: Students will master concepts and solve problems on permutation and abstract groups, subgroups, quotient groups, homomorphisms, isomorphisms, direct products, and rings. This course is the first of a two-semester sequence.

• Class schedule: You are expected to be present at all class meetings.

  Lecture: MWF 10:10 - 11:00 LeConte 303B

In accordance with official USC policy, a grade penalty may be applied to any student missing more than 3 classes (10%) during the semester.

• Homework: Problem sets will be assigned each week and will be due the following Wednesday. They may be turned in before class on Wednesdays or to my mailbox any time before 3 pm on the due date. Late homework will not be accepted. Some of the assigned problems will be graded. You will be graded on both the correctness of your solutions and the quality of your exposition (i.e., how well you write the solution). You are encouraged to discuss problems with other students in the class. However, you must write solutions to the problems yourself (in your own words).
