

Report: Survey Results

Dear Instructor Wright,

This email contains results for Finite Mathematics:

The global indicators are listed first, followed by the individual average values, consisting of the following scales:

- INSTRUCTOR EVALUATION (Part I)
- INSTRUCTOR OVERALL
- STUDENT OUTCOME (PART II)
- COURSE EVALUATION (Part III)
 OVERALL COURSE EVALUATION (PART IV)
 MISCELLANEOUS INSTRUCTOR QUESTIONS

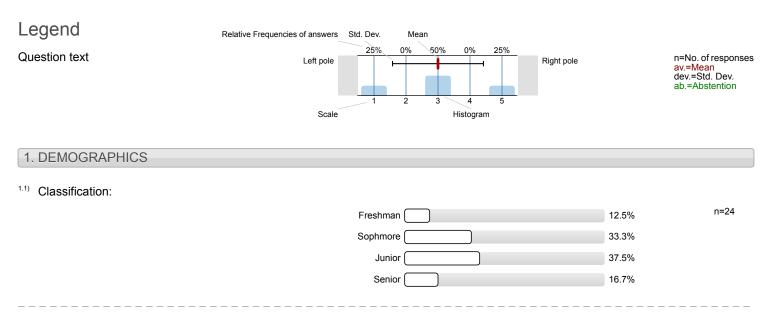

In the second part of the analysis the average values of all individual questions are listed.

Duncan Wright Finite Mathematics (MATH170-001-FALL-2017) No. of responses = 24 No. of enrolled = 37 % returned = 64.86

Comments Report

7. COURSE EVALUATION (PART V)

^{7.3)} Please comment on what you feel are the positive and negative aspects of your instructor and his/her teaching outlook:

He was very approachable and open to students' questions and feedback.

The instructor is good at showing how to do the work but needs to work on how he explains it.

He to a really nice person, but does not convey material like he understands it. Left me more than conjuracl on one accession, so I consulted the booke which left me equally so. One instores that I reall specifically he sport 20 minutes on a problem, realized it was completely incorrect and told the whole class to go early and that he was sorry for wasting our time.

- vert respectful , made students feel comportable asking questions for clarification one of the nicest teachers live had!
- sometimes didn't know the matchial well enough for us to understand so confusing at times.

After half way through the course he stated to emolil us with reminders on due dates tests quittes, etc. That was extremely helpful and I hish he would have stated that soo her, It was great with the numerous example he gave and the hamework helped to see if you understood the topic. Also, the homework was not tedicus in the sonse of having to of the same of questions but the questions varied.

> Positive : he gives out wonsheets with the things we'll need to know exactly negative · nothing

Thy not to go so indicate about the material, can become confusery, when some so meny ideas are in one tapic.

positive: wants students to succeed

I like the style in which he teached and the handouts he provided that supplement his teaching / lecture.

the is very disorganized and not prepared. He is not consident which makes the class question him we need to correct his mistakes a eot.

NIA

I like how homework was done via webassign.

I think better communication about quizzes/hw

from the start would've been good

Ht did a great jub of working to help w leaven the material whenever we needed. I ftel as though the way he explains some concepts can be difficult to understand. Might be good to slow down a little & show other approaches.

- ·No negatives
- · Good venue of humor, always on time, understands the material t teaches well not too much HW, willing to meet outside of class

I really liked the instructor, he explained the material quit slow so it was really good for understanding.

invested in making sure we know the matchal

He is very reasonable with the amount of homework and is easy to talk to. However, he focuses too much on game theory

^{7.4)} Comment on what you feel are the positive and negative aspects of this course:

The homework reflected what we did in class and helped me understand the lessons more.

Course has nothing to de with being a brology mayor. Probability and carino genes haven't come up & tome in my other courses.

Negative repetitive information.

positive went in depth

It is a great class and more useful ithans (all 2 with what] want the down it future.

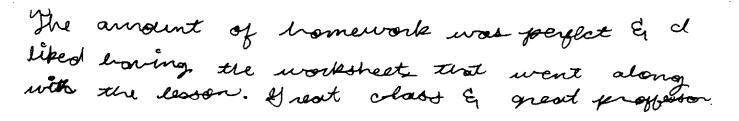

not the most useful class

Aly

I don't see how I'll use any of this in the fluture unless I frequent casines.

spend more time on probability sections

The homework were harder than what we did in doss and some exercices I didn't know how to do them because no examples were done in class.

It should not include as much probability.
