2017 Spring: Omit numbers 9 and 13.

Solutions on homepage (under previous exams).

NAME: _____

PIN: _____

INSTRUCTIONS

- **On Problem 0**, fill in the blanks. As you know, if you do not make at least half of the points on Problem 0, then your score for the entire exam will be whatever you made on Problem 0.
- **For multiple choice problems 1– 9**, circle your answer(s) on the provided chart. No need to show work. The STATEMENT OF MULTIPLE CHOICE PROBLEMS will not be collected.
- **For problems ≥ 10** , to receive credit you **MUST** show ALL your work and :
 - (1) **work in a logical fashion, show all your work, indicate your reasoning; no credit will be given for an answer that *just appears*;**
such explanations help with partial credit
 - (2) if a line/box is provided, then:
 - show you work BELOW the line/box
 - put your answer on/in the line/box
 - (3) if no such line/box is provided, then box your answer.
- Upon request, you will be given as much (blank) scratch paper as you need.
- Check that your copy of the exam has all of the problems.
- During the exam, the use of unauthorized materials is prohibited. Unauthorized materials include: electronic devices, books, and personal notes. Unauthorized materials (including cell phones) must be in a secured (e.g. zipped up, snapped closed) bag placed completely under your desk or, if you did not bring such a bag, given to Prof. Girardi to hold for you during the exam (and they will be returned when you leave the exam). This means no electronic devices (such as cell phones) allowed in your pockets. At a student's request, I will project my watch upon the projector screen.
- During this exam, do not leave your seat unless you have permission. If you have a question, raise your hand. When you finish: put your pencil down and raise your hand.
- This exam covers (from *Calculus* by Thomas, 13th ed., ET): §8.1–8.5, 8.7, 8.8 .

Honor Code Statement

I understand that it is the responsibility of every member of the Carolina community to uphold and maintain the University of South Carolina's Honor Code.

As a Carolinian, I certify that I have neither given nor received unauthorized aid on this exam.

I understand that if it is determined that I used any unauthorized assistance or otherwise violated the University's Honor Code then I will receive a failing grade for this course and be referred to the academic Dean and the Office of Academic Integrity for additional disciplinary actions.

Furthermore, I have not only read but will also follow the instructions on the exam.

Signature : _____

0. Fill in the blanks (each worth 1 point).

. If $u \neq 0$, then $\int \frac{du}{u} =$ _____ $+ C$

. $\int \cos u \, du =$ _____ $+ C$

. $\int \sin u \, du =$ _____ $+ C$

. $\int \tan u \, du =$ _____ $+ C$

. $\int \sec u \, du =$ _____ $+ C$

. $\int \sec^2 u \, du =$ _____ $+ C$

. $\int \sec u \tan u \, du =$ _____ $+ C$

. Integration by parts formula: $\int u \, dv =$ _____

. Partial Fraction Decomposition. If one wants to integrate $\frac{f(x)}{g(x)}$ where f and g are polynomials and $[\text{degree of } f] \geq [\text{degree of } g]$, then one must first do _____

. Trig. Substitution ($a > 0$): (recall that the *integrand* is the function you are integrating)

▷ if the integrand involves $a^2 + u^2$, then one makes the substitution $u =$ _____

▷ if the integrand involves $a^2 - u^2$, then one makes the substitution $u =$ _____

▷ if the integrand involves $u^2 - a^2$, then one makes the substitution $u =$ _____

. Trig. Formulas:

▷ $\sin(2\theta) =$ _____ (your answer should involve trig functions of θ , and not of 2θ)

▷ $\sin^2(\theta) =$ _____ ($\cos(2\theta)$ or $\sin(2\theta)$ should appear in your answer)

. $\arctan(-1) =$ _____ **RADIANS**. (your answer should be an angle)

STATEMENT OF MULTIPLE CHOICE PROBLEMS

- Hint. For a typical (i.e. not improper) definite integral problems $\int_a^b f(x) dx$.
 - (1) First do the indefinite integral, say you get $\int f(x) dx = F(x) + C$.
 - (2) Next check if you did the indefinite integral correctly by using the Fundamental Theorem of Calculus (i.e. $F'(x)$ should be $f(x)$).
 - (3) Once you are confident that your indefinite integral is correct, use the indefinite integral to find the definite integral.
- Hint. If $a, b > 0$ and $r \in \mathbb{R}$, then $\ln b - \ln a = \ln\left(\frac{b}{a}\right)$ and $\ln(a^r) = r \ln a$.

Hint: $\ln b - \ln a = \ln\left(\frac{b}{a}\right)$ and $\ln b + \ln a = \ln(ba)$ and $\ln(a^r) = r \ln a$ if $a, b > 0$ and $r \in \mathbb{R}$.

1. Evaluate the integral

$$\int_{x=0}^{x=1} \frac{1}{x^2 + 1} dx .$$

- a. $\ln \sqrt{2}$
- b. $\ln 2$
- c. $\frac{\pi}{4}$
- d. $\frac{\pi}{2}$
- e. None of the others.

2. The integral

$$\int \frac{x}{x^2 + 1} dx$$

can be evaluated the following way.

- a. Trig. Substitution using the $x = \sin \theta$.
- b. A simple u - du substitution with $u = x^2 + 1$.
- c. The integrand is not in its Partial Fraction Decomposition (PDF) so find the integrand's PDF, for which long division is not necessary.
- d. The integrand is not in its Partial Fraction Decomposition (PDF) so find the integrand's PDF, for which long division is necessary.
- e. None of the others.

3. Evaluate the integral

$$\int_0^4 \frac{x}{x+9} dx .$$

- a. $4 - 9 \ln(13) + 9 \ln(9)$
- b. $13 - 9 \ln(4) + \ln(3)$
- c. $\frac{1}{9 \ln(13)} - \ln(3)$
- d. $4 - 13 \ln(9) + 3 \ln(18)$
- e. None of the others.

4. Evaluate the integral

$$\int_{x=1}^{x=e} \ln x \, dx .$$

- a. $\frac{1}{e} - 1$
- b. $1 - \frac{1}{e}$
- c. $2e - 1$
- d. 1
- e. None of the others.

5. Evaluate the integral

$$\int_{x=0}^{x=\frac{\pi}{2}} \cos^3 x \sin^4 x \, dx .$$

- a. $\frac{4}{45}$
- b. $\frac{14}{45}$
- c. $\frac{2}{35}$
- d. $\frac{12}{35}$
- e. None of the others.

6. Let $y = p(x)$ be a polynomial of degree 5.
What is the form of the partial fraction decomposition of

$$\frac{p(x)}{(x^2 - 1)(x^2 + 1)^2} ?$$

Here A, B, C, D, E and F are constants.

- a. $\frac{A}{x^2 - 1} + \frac{B}{(x^2 + 1)^2}$
b. $\frac{Ax + B}{x^2 - 1} + \frac{Cx + D}{(x^2 + 1)^2}$
c. $\frac{Ax + B}{x^2 - 1} + \frac{Cx + D}{x^2 + 1} + \frac{Ex + F}{(x^2 + 1)^2}$
d. $\frac{A}{x - 1} + \frac{B}{x + 1} + \frac{Cx + D}{x^2 + 1} + \frac{Ex + F}{(x^2 + 1)^2}$
e. None of the others.
7. Evaluate the integral

$$\int_{x=-\infty}^{x=\infty} \frac{1}{1 + x^2} dx .$$

- a. 0
b. π
c. diverges to infinity
d. does not exist but also does not diverge to infinity
e. None of the others.
8. Evaluate the integral

$$\int_{x=-1}^{x=1} \frac{1}{x^3} dx .$$

- a. 0
b. $\frac{1}{4}$
c. diverges to infinity
d. does not exist but also does not diverge to infinity
e. None of the others.

SHOW ALL YOUR WORK.

10. $\int \sin x \sec x \, dx =$ + C

11. $\int \frac{4x^2 + 13x - 9}{x^3 + 2x^2 - 3x} \, dx =$ + C

Hint: $x^3 + 2x^2 - 3x = x(x + 3)(x - 1)$.

12. $\int \frac{1}{\sqrt{x^2 + 8x + 25}} \, dx =$ + C
