## INSTRUCTIONS

- This exam comes in two parts.
(1) STATEMENT OF MULTIPLE CHOICE PROBLEMS (pages 3-16).

Do not hand in this part. Take this part home to learn from and to check your answers once solutions are posted.
(2) HAND IN PART (pages 1-2). Hand in only this part.

Once you finish working the problems, raise your hand. You will be given the HAND IN PART to indicate your solutions on a table.
Check that your copy of the exam has all 16 pages.

- During this exam, do not leave your seat unless you have permission. If you have a question, raise your hand. When you finish: turn your exam over, put your pencil down and raise your hand.
- During the exam, the use of unauthorized materials is prohibited. Unauthorized materials include: books, personal notes, electronic devices, and any device with which you can connect to the internet. Unauthorized materials (including cell phones, as well as your watch) must be in a secured (e.g. zipped up, snapped closed) bag placed completely under your desk or, if you did not bring such a bag, given to Prof. Girardi to hold during the exam (it will be returned when you leave the exam). This means no electronic devices (such as cell phones) allowed in your pockets.
- Cheating is grounds for a F in the course.
- At a student's request, I will project my watch upon the projector screen. Upon request, you will be given as much (blank) scratch paper as you need.
- This exam covers (from Calculus by Thomas, $13^{\text {th }}$ ed., ET): §8.1-8.5, 8.7, 8.8, 10.1-10.10, 11.1-11.5 .

## STATEMENT OF MULTIPLE CHOICE PROBLEMS

This portion of the exam is NOT collected.
Thus you do not have to show your work.

- When you initially work through the Multiple Choice Problems, indicate your answers directly on the Statement of Multiple Choice Problems portion of the exam, which is not collected.
- After you have finished working all of the Multiple Choice Problems, circle your answers in the Table for Multiple Choice Solutions, which is collected.
- You may choice up to 1 answer for each multiple choice problem. The scoring is as follows.
* For a problem with precisely one answer marked and the answer is correct, 3 points.
* All other cases, 0 points.
- Hint. For a definite integral problems $\int_{a}^{b} f(x) d x$.
(1) First do the indefinite integral, say you get $\int f(x) d x=F(x)+C$.
(2) Next check if you did the indefininte integral correctly by using the Fundemental Theorem of Calculus (i.e. $F^{\prime}(x)$ should be $f(x)$ ).
(3) Once you are confident that your indefinite integral is correct, use the indefinite integral to find the definite integral.
- Hint. Laws of Logs. If $a, b>0$ and $r \in \mathbb{R}$, then: $\quad \ln b-\ln a=\ln \left(\frac{b}{a}\right) \quad$ and $\quad \ln \left(a^{r}\right)=r \ln a$.
- Abbreviations used with Series:
- DCT is Direct Comparison Test.
- LCT is Limit Comparison Test.
- AST is Alternating Series Test.
