

Before starting to LaTeX up Exercise Set 5, work through (as explained the the web page) the short Latex Lesson 5 (how to make a list) at LaTeX Lessons.

Exercise 1. Read through the

Writing Guidelines

These *Writing Guidelines* are located in the top box of our Math 300 Homework page (since we will be using them often in this course) and are an expansion of the *Writing Guidelines* located in Appendix A of our textbook.

Exercise 1a. List out all 15 *Writing Guidelines*. I got you started and did number 6 (a hard one to LaTeX) as an example.

- (1) write here
- (2) write here
- (3) write here
- (4) write here
- (5) write here
- (6) Do not use * for multiplication or ^ for exponents.
- (7) keep going with numbers 7–15.

Exercise 1b. Either:

- make a list (using *enumerate*) of questions you have over the 15 *Writing Guidelines*

or

- state that you understand, and will follow, each of the 15 *Writing Guidelines*.
