

- . **Conjecture B.** There exist integers  $x$  and  $y$  such that  $6x + 15y = 2$ .
1. Symbolically write Conjecture B.
  2. State whether Conjecture B is true or false.
  3. Justify your answer to part 2. If Conjecture B is true, then provide a specific example that shows the conjecture is true. If Conjecture B is false, then clearly explain why the conjecture is false.
