

Homework Due Wednesday February 21

1. Do Page 115 #5ab **except** in part (b) use separation of variables to give an exact answer instead of using Euler's method (which only gives an approximate answer).
2. Pages 653–655 #2, #3, #4, #8 (in #8 you can assume that $p > 1$.)

Homework Due Wednesday February 21
