Quiz – March 23, 2004

Write $.013013013\dots$ as a ratio of two integers.

Answer: Let $r = .013013013\dots$. Observe that $1000r = 13.013013013\dots$; and therefore $999r = 1000r - r = 13$. It follows that $r = 13/999$.
