CURRICULUM VITAE
Linyuan Lu

(March 17, 2018)

Department of Mathematics
University of South Carolina
Columbia, SC 29208
USA

Phone: (803) 576-5822 (O)
(803) 781-8457 (H)
E-mail: lu@math.sc.edu
http://people.math.sc.edu/lu/

RESEARCH INTERESTS

Large information networks, probabilistic methods, spectral graph theory, random graphs, extremal problems on hypergraphs and posets, algorithms, and graph theory.

EDUCATION

Ph. D. in Combinatorics, December 2002.
Thesis title: *Probabilistic methods in massive graphs and Internet computing;*
Supervised by Professor Fan Chung Graham.
University of California at San Diego, La Jolla, CA.

M. S. in Computer Science (5/99), M. S. in Mathematics (8/99).
University of Pennsylvania, Philadelphia, PA.

B. S. in Mathematics (7/91).
Nankai University, Tianjin, China.

POSITIONS

Full professor, Department of Mathematics, University of South Carolina,	(01/2013–present)
Associate professor, Department of Mathematics, University of South Carolina,	(08/2009–12/2012)
Assistant professor, Department of Mathematics, University of South Carolina,	(08/2004–08/2009)
Postdoc, Department of Mathematics, University of California, San Diego,	(10/2002–08/2004)

AWARD

Receiving a prize of $100 from Ron Graham on December 8, 2007 for settling a twenty-years-old Erdős prized problem.

SUMMARIES

Publications: 1 book, 2 book chapters, 52 Journal papers, 13 conference papers, and 10 preprints.
Presentations: series of six 60-minute talks, series of five 90-minute talks, series of fourteen 90-minute talks, series of six 90-minute talks, thirty-three 50-minute invited talks, forty-five 25-minute invited conference talks, 5 contributed talks, and 31 local seminar talks.
Grants: ONR N00014-17-1-2842, NSF DMS-1600811, NSF DMS-1300547, ONR N00014-13-1-0717, NSF DUE-CCLI-1020692, NSF DMS-1000475, and NSF DMS-0701111.
Editorial board: Order (01/16 – present), *Managing editor* (07/09 – 01/13) and editor (01/13 – present) for the Journal of Combinatorics.
Services: Serving in an NSF panel, organizing 7 sections/conferences, reviewing 12 NSF/NSA grants, and refereeing 72 papers in 25 Journals/conferences.
Supervision: three finished Ph. D. student, three current Ph. D. students, two Master students, three visiting students, three (other) co-authored students, and four undergraduate students.

PUBLICATIONS

(a) Books

1. Fan Chung and Linyuan Lu, *Complex graphs and networks*, CBMS Regional Conference Series in Mathematics; number 107, (2006), 264+vii pages. ISBN-10: 0-8218-3657-9, ISBN-13: 978-0-8218-3657-6.

(b) Book Chapters

2. Linyuan Lu, Austin Mohr, and László Székely, Quest for Negative Dependency Graphs, in *Recent Advances in Harmonic Analysis and Applications: In Honor of Konstantin Oskolkov* (Eds. D. Bilyk, L. DeCarli, A. Petukhov, A. M. Stokolos, B. D. Wick), Springer Proceedings in Mathematics & Statistics, (2012) 243-258.

3. William Aiello, Fan Chung, and Linyuan Lu. Random evolution in massive graphs, in *Handbook on Massive Data Sets*, (Eds. James Abello et al.), (2002) 97–122.

(c) Referred Journal Papers

4. Shuliang Bai and Linyuan Lu, A Bound on the Spectral Radius of Hypergraphs with e Edges, *Linear Algebra and its Application*, **549**, (2018), 203-218.

5. Linyuan Lu and Shoudong Man, Connected Hypergraphs with Small Spectral Radius, *Linear Algebra and its Application*, **509**, (2016), 206-227.

6. Linyuan Lu, Kevin G. Milans, Set families with forbidden subposets, *J. Combin. Theory Ser. A.*, **136**, (2015) 126142.

7. Travis Johnston, Linyuan Lu, and Kevin Milans, Boolean algebras and Lubell functions, *J. Combin. Theory Ser. A.*, **136**, (2015) 174183.

8. Linyuan Lu and Laszlo Szekely, A new asymptotic enumeration technique: the Lovasz Local Lemma, *J. Combin. Theory Ser. B*, to appear.

9. Travis Johnston and Linyuan Lu, Turan Problems on Non-uniform Hypergraphs, *Electronic Journal of Combinatorics*, **21** (4), (2014), P22.

10. Linyuan Lu, On crown-free families of subsets, *Journal of Combinatorial Theory Ser. A*, **126** (2014) 216-231.

11. Yong Lin, Linyuan Lu, S.-T. Yau, Ricci-flat graphs with girth at least five, *Communications in Analysis and Geometry*, **22** No. 4, (2014) 671687, 2014.

CONFERENCES and PRESENTATIONS

(a) Serial talks

- A series of six 60-minute talks on "Random Graph Theory", Nankai University, Tianjin, China, July 7-30, 2015.

- A series of five 90-minute talks on "Selected topics on spectral graph theory", Nankai University, Tianjin, China, May 16-June 12, 2014.

- A series of fourteen 90-minute talks on "Probablistic methods in Combinatorics", Mathematical Sciences Center, Tsinghua University, Beijing, China, November 16 – December 30, 2011.

- A series of six 90-minute talks on "Complex graphs and networks", *BASICS'08 Summer School on Graphs and Algorithms*, Guiyang, China, July 27 – August 3, 2008.

(b) Invited 50-minute talks

1. Unrolling residues to avoid progressions, Zhejiang University, Hangzhou China, June 22, 2017.

2. Extremal poset problems, *2017 XiAn International Workshop on Graph Theory and Combinatorics* Northwestern Polytechnical University, XiAn, China June 16-17, 2017. (40 minutes).

3. A Bound on the Spectral Radius of Hypergraphs with e Edges, *Recent Advances in Extremal Combinatorics Workshop*, Tsinghua Sanya International Mathematics Forum, Sanya, China, May 22-26, 2017. (45 minutes)

4. Some Extremal Problems on the Spectral Radius of Graphs and Hypergraphs, Shanghai University, March 7 2017.

5. Ricci-flat Graphs with Girth at least Five, *Curvaures of Graphs, Simplicial Complexes and Metric Spaces Workshop*, Tsinghua Sanya International Mathematics Forum, Sanya, China, March 13-17, 2017.

6. Normalized Laplacian Tensor and Isoperimetric Inequalities for Uniform Hypergraphs, *International Workshop on Spectral Hypergraph Theory*, Harbin Engineering University, May 26-29, 2016.

7. Laplacian Spectra for Random Graphs and Hypergraphs, *Workshop on Tensor, Matrix, and Their Applications*, Nankai University, Tianjin, May 2124, 2016.

8. Connected Hypergraphs with Small Spectral Radius, Shanghai Jiao Tong University, August 5, 2015.

9. Connected Hypergraphs with Small Spectral Radius, *International Symposium on Hypergraphs and Hypernetworks*, XiNing, China, July 24-26, 2015.

10. Laplacian Spectra for Random Graphs and Hypergraphs, *Geometry and Analysis on Graphs*, Fudan University, Shanghai, China, July 22-23, 2015.

11. Unrolling residues to avoid progressions, *Tianjin University*, Tianjin, China, June 6, 2014.

12. Probabilistic Methods for Complex Graphs, *Zhejiang Wanli University*, Ningbo, China, May 27, 2014.

13. Probabilistic Methods for Complex Graphs, *Middle Tennessee State University*, Murfreesboro, TN, March 24, 2014.

14. Forbidden configurations and repeated columns, *Institute of Mathematics, Academia Sinica*, Taipei, Taiwan, November 29, 2013.

15. Graphs with small spectral radius, *Workshop on Spectral Graph Theory and Related Topics*, Taipei, Taiwan, November 28, 2013.

16. Unrolling residues to avoid progressions, *Nankai University*, Tianjin, China, August 2, 2013.

17. Probabilistic Methods for Complex Graphs, *Tongji University*, Shanghai, China, July 22, 2013.

18. Extremal Problems on Subsets and Hypergraphs, *The Sixth International Congress of Chinese Mathematicians*, Taipei, July 14-19, 2013. (45 minutes)

19. Unrolling residues to avoid progressions, *Georgia State University*, Atlanta, GA, May 1, 2013.

20. Probabilistic Methods for Complex Graphs, *William & Mary*, Williamsburg, VA, April 19, 2013.

21. Extremal families of subsets and the Lubell function, *University of Delaware*, Newark, DE, April 19, 2012.

22. Probabilistic methods for complex graphs, *Institute of Computing Technology, Chinese Academy of Sciences*, December 26, 2011.

23. Graph percolation and Laplacian on hypergraphs, Renmin University, Beijing, China, December 2, 2011.

24. The giant component in a random subgraph of a given graph, *Atlanta Lecture Series in Combinatorics and Graph Theory* **IV**, Atlanta, November 5-6, 2011.

25. Explicit Construction of Small Folkman Graphs, *Tsinghua University*, Beijing, China, June 10, 2010.

26. A random graph model for massive graphs, *Differential Geometry Seminar at the Harvard University*, Oct. 11, 2009.

27. The giant component in a random subgraph of a given graph, *Combinatorics Seminar at Georgia Institute of Technology*, Atlanta, GA, October 9, 2008.

28. Probabilistic Methods for Complex Graphs, Combinatorics Center at Nankai University, Tianjin, China, June 2-5, 2008.

29. Explicit Construction of Small Folkman Graphs, *The 22nd Clemson mini-conference*, Clemson University, Clemson, SC, October 11-12, 2007.

30. Coloring Non-Uniform Hypergraphs Red and Blue, *Combinatorics Seminar at Georgia Institute of Technology*, Atlanta, GA, May. 25, 2006.

31. Spectra of Random Power Law Graphs, *Combinatorics Seminar at Georgia Institute of Technology*, Atlanta, GA, Nov. 19, 2004.

32. Guessing Secrets, *Colloquium at Georgia State University*, Atlanta, GA, Nov. 19, 2004.

33. Random Graphs with Given Expected Degree Sequence, *Colloquium at NIU Mathematics Department*, Northern Illinois University, February 25, 2002.

(c) Invited 25-30 minute talks

1. A note on 1-guardable graphs in the cops and robber game, *AMS Fall Southeastern Sectional Meeting*, Orlando, FL, September 23-24, 2017.

2. A note on 1-guardable graphs in the cops and robber game, *AMS Fall Eastern Sectional Meeting*, Buffalo, NY, September 16-17, 2017.

3. Unrolling residues to avoid progressions, *2017 Workshop on Colored Notations of Connectivity in Graphs*, Nankai University, Tianjin, China, May 29-31, 2017.

4. Degenerate Hypergraphs, *SIAM Conference on Discrete Mathematics*, Georgia State University, Atlanta, June 6-10, 2016.

5. Turán Problems and Degenerate Hypergraphs, *Workshop on Extremal and Random Phenomenon in Discrete Mathematics*, Nankai University, Tianjin, China, May 14-15, 2016.

6. Connected Hypergraphs with Small Spectral Radius, *AMS Fall Southeastern Sectional Meeting*, Memphis, TN October 17-18, 2015.

7. Laplacian Spectra for Random Graphs and Hypergraphs, *8th International Congress on Industrial and Applied Mathematics*, Beijing, China, August 10-14, 2015.

8. Unavoidable Multicoloured Families of Configurations, *Connections in Discrete Mathematics*, Vancouver, BC, Canada, June 15-19, 2015.

9. Subgraphs in Random Non-uniform Hypergraphs, *The Canadian Discrete and Algorithmic Mathematics Conference*, Saskatoon, Canada, June 1-4, 2015.

10. A Combinatorial Identity on Galton-Watson Process, *28th Cumberland Conference on Combinatorics, Graph Theory & Computing*, Columbia, SC, May 15-17, 2015.

11. Unavoidable Multicoloured Families of Configurations, *AMS Spring Southeastern Sectional Meeting*, Huntsville, AL, March 27-29, 2015.

12. Computing Diffusion State Distance using Green's Function and Heat Kernel on Graphs, *11th International Workshop on Algorithms and Models for the Web Graph*, Beijing, China, December 17-18, 2014.

13. Connected Hypergraphs with Small Spectral Radius, *AMS Southeastern Sectional Meeting*, Knoxville, TN, March 21-23, 2014.

14. High Order Phase Transition in Random Hypergraphs, *Workshop on Probability and Graphs*, EURANDOM, Eindhoven, Netherlands, January 6-10, 2014.

15. Extremal problems on subsets and non-uniform hypergraphs, *Workshop in Combinatorics and Graph Theory*, Hunan University, Changsa, China, May 31-June 5 2014. (20 minutes)

16. Repeated columns and an old chestnut, *AMS Fall Southeastern Sectional Meeting*, Louisville, KY, October 5-6, 2013.

17. Turán Problems on Non-uniform Hypergraphs, *AMS Spring Central Sectional Meeting*, Iowa State University, Ames, IA, April 26-28, 2013.

18. Unrolling residues to avoid progressions, *37th annual meeting of the SIAM Southeastern Atlantic Section*, Knoxville, TN, March 22-24, 2013.

19. On crown-free families of subsets, *International Conference on Advances in Interdisciplinary Statistics and Combinatorics*, Greensboro, NC, October 5-7, 2012.

20. Turán Problems on Non-uniform Hypergraphs, *MIGHTY LIII conference*, Iowa State University, Ames, IA, Sept. 21-22, 2012.

21. Ricci-flat graphs with girth at least five, *25th Cumberland Conference on Combinatorics, Graph Theory, & Computing*, Johnson City, TN, May 10-12, 2012.

22. Diameters of Graphs with Spectral Radius at most $\frac{3}{2}\sqrt{2}$, *AMS Spring Southeastern Section Meeting*, Tampa, FL, March 10-11, 2012.

23. Monochromatic 4-term arithmetic progressions in 2-colorings of $\mathbb{Z}_n$, *Integers Conference*, University of West Georgia, Carrollton, GA, October 26-29, 2011.

24. High-ordered Random Walks and Generalized Laplacians on Hypergraphs, *AMS Fall Southeastern Section Meeting*, Wake Forest University, Winston-Salem, NC September 24-25, 2011.

25. Generalized Laplacian Eigenvalues of Random Hypergraphs, *The 15th International Conference on Random Structures and Algorithms*, Altanta, May 24-28, 2011.

26. Minimum spectral radius of graphs with diameter $n - e$, *The 25th Cumberland Conference on Combinatorics, Graph Theory, and Computing*, Louisville, KY, May 12-14, 2011.

27. An fractional analogue of Brooks' theorem, *The 8-th meeting of the Carolina Mathematics Seminar*, University of South Carolina Lancaster, Lancaster, SC, April 15, 2011.

28. Monochromatic short-term arithmetic progressions in $\mathbb{Z}_n$, *SIAM Southeastern Atlantic Section Conference*, Charlotte, NC, March 26-27, 2011.

29. An fractional analogue of Brooks' theorem, *AMS Spring Southeastern Section Meeting*, Statesboro, GA, March 12-13, 2011.

30. Ricci curvature of graphs, *AMS Fall Southeastern Section Meeting*, Richmond, VA, November 6-7, 2010.

31. The Fractional Chromatic Number of Triangle-free Graphs with $\Delta \leq 3$, *AMS Spring Central Sectional Meeting*, St. Paul, MN, April 10-11, 2010.

32. The giant component in a random subgraph of a given graph, *The 33rd SIAM Southeastern-Atlantic Section Conference*, University of South Carolina, April 4-5, 2009.

33. Diameter of Random Spanning Trees in a Given Graph, *AMS Spring Central Sectional Meeting*, University of Illinois at Urbana-Champaign, March 27-29, 2009.

34. Diameter of Random Spanning Trees in a Given Graph, *SIAM Annual Meeting*, San Diego, CA, July 7-11, 2008.

35. Explicit Construction of Small Folkman Graphs, *AMS Spring Central Section Meeting*, University of Indiana, Bloomington, IN, April 4-6, 2008.

36. On Families of Subsets with a Forbidden Subposet, *Mini-Conference on Applied Combinatorics*, University of South Carolina, Columbia, SC October 15-16, 2007.

37. On Families of Subsets with a Forbidden Subposet, *AMS 2007 Central Section Meeting*, Chicago, IL, October 5-6, 2007.

38. Using Lovász Local Lemma in the Space of Random Matchings, *Workshop on Complex Networks and their Application*, Georgia Institute of Technology, Atlanta, GA, January 22-24, 2007.

39. On a Problem of Erdős and Lovász on Coloring Non-Uniform Hypergraphs, *AMS Southeastern Section Meeting*, Fayetteville, AR, November 3–4, 2006.

40. Hexagon-free Subgraphs in the Hypercube, *Integers Conference 2005*, Carollton, GA, Oct. 27–30, 2005.

41. Duplication Models for Biological Networks, *Bioinformatics mini-symposium at University of South Carolina*, Columbia, SC, March 19, 2005.

42. Duplication Models for Biological Networks, *SIAM Southeast Atlantic Section Meeting*, Charleston, SC, Mar. 25–26, 2005.

43. Power Law versus Semicircle Law — Spectra of Random Power Law Graphs, *SIAM Conference on Discrete Mathematics*, Nashville, TN, USA, June 13-16, 2004.

44. Several Concentration Inequalities of Power Law Graphs, *Combinatorics of Large Sparse Graphs*, San Marcos, California USA, June 7-11, 2004.

45. Spectra of Random Power Law Graphs, *Workshop on Web Structure and Algorithms*, Carnegie Mellon University, Pittsburgh, PA, April 9-10, 2004.

(d) other 25-minutes talks at Conferences

1. Guessing secrets with inner product questions, *Symposium on Foundations of Computer Science*, San Francisco, California, January 6-8, 2002.

2. Guessing secrets with inner product questions, *AMS joint mathematics Meetings*, San Diego, California, January 7-9, 2002.

3. A random graph model for massive graphs, *Symposium on Theory of Computing*, Portland, Oregon, May 21-23, 2000.

4. Random evolution in massive graphs, *Symposium on Foundations of Computer Science*, Las Vegas, Nevada, October 14-17, 2001.

5. The diameter of random massive graphs, *Symposium on Discrete Algorithms*, Washington D.C. January 7-9, 2001.

(e) other 32 talks at local seminars; about 2-3 talks/per year.

GRANT

1. ONR N00014-17-1-2842, Hypergraph-based Causal Modeling, Linyuan Lu (PI) and Marco Valtorta, 9/1/2017-8/31/2018, $100,000.

2. NSF DMS-1600811, Extremal and Probabilistic Combinatorics with Applications II, László A. Székely and Linyuan Lu (Co-PI), 7/1/2016–6/30/2019, $180,000.

3. NSF DMS-1500991 Twenty-Eighth Cumberland Conference on Combinatorics, Graph Theory, and Computing, Linyuan Lu (PI) and Eva Czabarka, 03/01/2015-02/19/2016, $15,000.

4. NSF DMS-1300547 Extremal and Probabilistic Combinatorics with Applications, László A. Székely and Linyuan Lu (Co-PI), 7/1/2013–6/30/2016, $184,111.

5. ONR N00014-13-1-0717 Spectral, Probabilistic, and Information-theoretic Analysis for Graphs and Hypergraphs, Linyuan Lu (PI), 7/31/2013–11/29/2015, $196,226.

6. USC Office of the Provost, Summer School on Network Science at USC, László A. Székely, Linyuan Lu (Co-PI), and Qi Wang, 9/1/2012–6/30/2013, $21,949.

7. NSF DUE-CCLI-1020692 Collaborative Research: STEM Real World Applications of Mathematics, Linyuan Lu (PI) and Joshua Cooper, 10/1/2010-9/30/2013, $79,999.

8. NSF DMS-1000475 Extremal and probabilistic combinatorics, László A. Székely and Linyuan Lu (Co-PI), 7/1/2010–6/31/2013, $175,930.

9. NSF DMS-0701111: Extremal and probabilistic combinatorics, László A. Székely and Linyuan Lu (Co-PI), 8/1/2007–7/31/2010, $104,118.

SERVICES TO PROFESSION

(a) **EDITORIAL BOARD:** *Managing editor* for the Journal of Combinatorics (07/09 – 01/13). *Editor* for the Journal of Combinatorics (01/13 – present). *Editor* for Order (01/16 – present).

(b) Participated in 1 NSF Panel.

(c) External Services on organizing Workshop/Symposium

1. Orginaning the Workshop on Extremal and Random Phenomenon in Discrete Mathematics, Tianjin, China, May 14-16, 2016.

2. Organizing the 28-th Cumberland Conference on Combinatorics, Graph Theory, and Computing, Columbia, SC, May 15-17, 2015.

3. Co-organizing the Summer School on Network Science at USC, May 20-24, 27-31, 2013.

4. Co-organizing a section "Extremal Combinatorics", *AMS Spring Southeastern Section Meeting*, Tampa, FL, March 10-11, 2012.

5. Co-organizing a section "Extremal combinatorics" at *AMS Fall Southeastern Section Meeting*, Wake Forest University, Winston-Salem, NC September 24-25, 2011.

6. Program Committee member for "The 8th Workshop on Algorithms and Models for the Web-Graph" (WAW 2011), Emory University, May 28-29, 2011.

7. Co-organizing a mini-symposium "Extremal Problems in Discrete Math" at the 35th SIAM Southeastern Atlantic Section Conference, Charlotte, NC, March 26-27, 2011.

8. Program Committee member for "The 7th Workshop on Algorithms and Models for the Web-Graph" (WAW 2010), Stanford University, December 13-16, 2010.

9. Co-organizing a mini-symposium "Extremal and Probabilistic Combinatorics" (3 sessions) at the 33rd SIAM Southeastern-Atlantic Section Conference, Columbia, SC, April 4-5, 2009.

10. Organizing Committee member for "The 5th Workshop on Algorithms and Models for the Web-Graph" (WAW2007), La Jolla, December 11-12, 2007.

11. Organizing minisymposium "Probabilistic Methods for Complex Graphs" at 2008 SIAM Annual Meeting, San Diego, CA, July 7-9, 2008.

(d) Refereed 8 NSF proposals and 4 NSA proposals.
