

What is an Actuary?

Panel Discussion with Sean Russell, Ryder Best, and Keely Hein

September 21
7:00pm-8:00pm EST

Zoom: Email sanders@math.sc.edu for link.

At Cigna, we truly believe in the power of health – healthy people, healthy communities, and a healthier world. Join us to learn how actuaries contribute to play an increasingly important role at Cigna and across the industry. Opportunities range from traditional actuarial roles such as pricing and reserving, to newer roles in data analytics. During the panel discussion, three current actuaries will talk about each of their experiences navigating actuarial work to provide a better understanding of what an actuary does.

We look forward to meeting with you!
