& GAMECOCK MATH CLUB

Presentation by Mitchel Colebank

**Goal:** The goal of this meeting of PME/GMC is to provide undergraduate (and graduate students who attend!) an opportunity to learn about careers in mathematics that are not described by the title of “mathematician.” We will begin with a presentation by Dr. Colebank, an assistant professor in Math, about the career opportunities available to students who will obtain a degree in mathematics or a closely related program. This will lead us into several hands on sessions with participants, including a resume station for industry internships, an REU/research station, and a “career search” station for people to take their turn at trying to find careers that are applicable to new mathematics graduates.

Wednesday 4<sup>th</sup> March 2026 at 6:00pm
