Math 544 Course Outline
Fall 2000
MWF 10:10–11:00, Section 001

Text:  Linear Algebra and Its Applications, updated second edition
       by: David C. Lay

Professor: Anton R. Schep
Office: LeConte 300C
Phone: 7-6190
Email: schep@math.sc.edu
Office hours: T-TH 10:30–12:00, or by appointment
Prerequisite: MATH 241
Tests: 3 one hour tests, each counting 20%, 1 Final exam counting 30%
Tentative test dates: Test 1, Friday, September 29; Test 2, Wednesday, November 1; Test 3, Monday, December 4
HW+Quizzes: 10%
Date of Final Exam: Friday, December 15, 9:00 AM
Material to be covered: Chapter: 1, 2, 4, 5 and 6

In the early part of the course the manipulative aspects of linear algebra will be emphasized: Gaussian elimina-
tion to solve linear equations and matrix methods. The course however is intended to be more than just matrix
algebra. As the course progresses many of the early topics will be revisited—with more emphasis on the abstract theory of linear algebra. Proofs will be
discussed in class and you will be expected to do some proofs in homework and tests.

Make-up policy: No make-ups for missed homework or quizzes (lowest 2 or 3 scores will be dropped), make-ups for missed hourly tests or final will only be
given if they were missed for legitimate reasons. In this case any effort should be made to contact me as soon as possible and you might need to
provide documentation to support your reasons for missing the tests.
