Math 580: Quiz 6

Show ALL Work   Name _____

1. What is the smallest positive integer t such that

$$5105\,t \equiv 4 \pmod{15366}?$$

   This is NOT a Chinese Remainder Theorem problem. You should be able to do this for Test 1.

   $t = $ ⬚ (Note: t should be the least positive integer as above.)
