

Name: _____

Work in groups to answer as many problems as you can. Ask questions if you get stuck.

1. Find a linear model to represent the data for each of the following tables.

(a)

x	y
0	-10
1	-4
2	2
3	8

Answer: _____

(d)

x	y
0	110
2	98
4	86
6	74

Answer: _____

(b)

u	v
0	205
1	218
2	231
3	244

Answer: _____

(e)

w	z
0	55
3	52
6	49
9	46

Answer: _____

(c)

a	b
0	17
3	38
6	59
9	80

Answer: _____

(f)

x	y
0	19
1.5	34
3	49
4.5	64

Answer: _____

2. Determine if the graphs below represent functions.

Answer: _____

Answer: _____

Answer: _____

Answer: _____

Answer: _____

Answer: _____

Answer: _____

Answer: _____

3. Find the domain of the given function.

(a) $f(x) = 9 - x$

Answer: _____

(g) $f(t) = \frac{10t}{\sqrt{6-4t}}$

Answer: _____

(b) $P(z) = z^2 - 4$

Answer: _____

(h) $f(w) = \frac{\sqrt{w+7}}{\sqrt{2-w}}$

Answer: _____

(c) $h(x) = \frac{2+x}{8x-1}$

Answer: _____

(i) $A(z) = \sqrt{z^2 - 9z}$

Answer: _____

(d) $A(t) = \frac{t^2 - 4}{t^2 + 6t - 7}$

Answer: _____

(j) $h(z) = \sqrt{z^2 - z - 20}$

Answer: _____

(e) $h(w) = \frac{w^2 + 3w + 2}{w^2 + 12w + 36}$

Answer: _____

(k) $g(t) = \sqrt{\frac{6+t}{5t-10}}$

Answer: _____

(f) $g(x) = \sqrt{10x - 15}$

Answer: _____

(l) $g(t) = \sqrt{\frac{6+t}{10-5t}}$

Answer: _____

4. (a) An internet bookstore charges \$15 shipping for orders under \$100 but provides free shipping for orders of \$100 or more.
- i. Find a piecewise function C that represents the cost of an order based on the total price x of books purchased.

ii. Find $C(75)$, $C(100)$ and $C(105)$.

Answer: _____

Answer: _____

Answer: _____

- (b) A hotel chain charges \$74 dollars per night for the first two nights and \$50 for each additional night.

i. Express the total cost T as function of the number of nights x that a guest stays.

ii. Find $T(2)$, $T(3)$ and $T(5)$.

Answer: _____

Answer: _____

Answer: _____

- (c) In a certain state, the maximum speed permitted on freeways is 65mph, and the minimum is 40mph. The fine for violating these limits is \$15 for every mile above the speed limit or \$10 for every mile below the speed limit.
- Express the total cost of the fine F in terms of the driving speed x on the freeway.

- Find $F(30)$, $F(50)$ and $F(75)$.

Answer: _____

Answer: _____

Answer: _____

- (d) A utility company charges a base rate of 10 cents per kilowatt hour (kWh) for the first 350 kWh and 15 cents per kilowatt hour for all additional electricity usage.
- Express the amount E that the utility company charges when x kilowatt hours of electricity is used.

- Find $E(300)$, $E(350)$ and $E(600)$.

Answer: _____

Answer: _____

Answer: _____

- (e) To discourage excessive water use, a city charges its residents \$0.008 per gallon for households that use less than 4,000 gallons a month and \$0.012 for households that use 4,000 gallons or more.
- Find a piecewise function C that gives the water bill for a household using x gallons of water.

ii. Find $C(3,900)$ and $C(4,200)$.

Answer: _____

Answer: _____

- (f) In a certain country, income tax T is assessed based on a persons total income (in dollars). A person is charged as follows;
- If the persons income is \$10,000 or less, no tax is charged.
 - If the person earns more than \$10,000 but no more than \$20,000, they are charged 8% of their total income.
 - If the person earns more than \$20,000, they are charged the same %8 on anything up to \$20,000 and a further 15% on anything over 20,000.
- Find a piecewise function T that represents the tax paid by a person earning x dollars.

ii. Find $T(5,000)$, $T(12,000)$ and $T(25,000)$.

Answer: _____

Answer: _____

Answer: _____
