Comments Report

7. COURSE EVALUATION (PART V)

7.3) Please comment on what you feel are the positive and negative aspects of your instructor and his/her teaching outlook:

Great instructor of principles.

Josh was a great teacher for recitation, however there seemed to be a disconnect between what was taught, what was reviewed, and what we were tested on.

He is a good guy and in a one on one situation outside the classroom he explains things really well. This is not to take away from his in classroom teaching, just preference.

My instructor was willing to meet with me when needed + my emails were always addressed in a timely manner, even over breaks.

He is very understanding and helpful. Is open to working w/ you reasonably.

Easy to follow, entertaining, cares if the students understand the given problem or not.

N/A

Maple kind of sucks. I feel like I don't learn anything from maple. I'm just doing it simply for a grade.

Windows.exe has stopped working ⑧

N/A

Get rid of maple lab

He clearly explains the process of how to do a problem.

Make sure professor explains better
in lecture

He is very knowledgeable and helpful

7.4) Comment on what you feel are the positive and negative aspects of this course:

The instructor was very swift with responses.

Maple lab is a waste of time and graded ridiculously

The maple labs did not aid my understanding of this course. I would've much rather have an extra recitation. The tests were too difficult compared to what was taught.

The class is really hard and moves at break neck speed, missing one day puts you behind a lot. Also the written homework should just be online.

The maple labs did not contribute to my understanding of the course material.

Maple Lab needs to go.
Waste of time and class.
Recitation is useful, though.

Exams were very hard + course was tough to grasp. Examples helped

Material
Lectures. recited did not match
time. Mark is a waste of

Maple is bad.

good

N/A

Good recitation teacher, bad professor

negatives - course is way too hard and ~~test~~ tests are much harder than in-class examples and work
