

Math 704 Course Outline

Spring 2019

MW 2:20 -3:35

Text: *An Introduction to Measure Theory*
by: Terence Tao

Professor: Anton R. Schep

Office: LeConte 317F

Webpage: <http://people.math.sc.edu/schep/math704-2019.html>

Phone: 7-6190

Email: schep@math.sc.edu

Office hours: T 1:00–3:00, or by appointment (just see whether I am available)

Homework assignments <http://people.math.sc.edu/schep/math704-2019.html>

Tests: 2 one hour and 15 minute tests, each counting 25%, 1 Final exam counting 30%

Tentative test dates: Test 1, Wednesday February 27; Test 2, Wednesday, April 17.

HW: 20%. Note: homework is extremely important in this course! I strongly encourage cooperation on homework, but you should always write the solutions in your own words, i.e., if I detect literally copied solutions neither student will get credit for the solutions.

Date of Final Exam: Friday, May 3 - 12:30 PM

Material to be covered: Chapter: 1, plus supplemental notes on L^p -spaces

Attendance policy: A grade penalty can be invoked, if more than 10% of classes are missed. As I will not follow the text very closely, it is very important to miss the least possible number of classes.

Learning Objectives: The objective of this course is to prepare you for the qualifying exam in Analysis. If you are successful you will be able to answer the questions on the Qualifying Examination dealing with measure theory, Lebesgue integration, L^p -spaces and convergence theorems.

Cellphone policy: Please turn your phone off or on silent mode while in class.

Disability Statement Any student with a documented disability should contact the Student Disability Resource Center at 777-6142 to make arrangements for appropriate accommodations.
